PROFILE

A hard-working and self-motivated individual passionate about full-stack development. A strong track record of success with the ability to communicate and build strong relationships to achieve set objectives on time. Looking to return to tech within a leading organisation to apply my skills, broaden my experience and produce a successful long-term career.

PROFESSIONAL EXPERIENCE

Web Developer at Exam Star
08/2022 – present
Remote, UK

Working in a team of volunteers to update and maintain the website for multiple tutors.
- Updating and maintaining the website by checking for errors and broken links.
- Editing, writing and designing website content.
- Assisting with publishing content by proofreading, editing and posting text and graphics.
- Identifying problems uncovered by service user feedback, and correcting or referring problems to management.

Website Designer at Educating Beyond Borders
05/2022 – 08/2022
Remote, UK

Successfully designed prototype for a mental health initiative.
- Created a high-fidelity prototype in Figma for the mental health initiative 'Comfort Story'. The design was approved by Big Issue Investors to be built by the development team.

Web Administrator at SJJ Packaging
09/2020 – 02/2022
Wolverhampton, UK

Built the company webpage and successfully dealt with multinational clientele.
- Provided administrative services relating to order bookings, cancellations, and general enquiries.
- Built the company webpage using front-end development.
- Effectively utilised excel to process invoices and receipts according to company standards.
- Governed the distribution of mail and email correspondence for the director.

Health and Wellbeing career break
11/2018 – 08/2020
Birmingham, UK

- I took time off to treat a medical condition that is no longer an issue.

Junior Web Developer at University of Wolverhampton
11/2017 – 11/2018
Wolverhampton, UK

Successfully worked with lead developer to work on University systems.
- Maintained legacy pages using Microsoft Technologies (ASP.NET, VB, IIS Manager, SQLServer 2014, SSMS 2017).
- Improved and built webpages using Bootstrap, Html, CSS, and JavaScript resulting in a more responsive UI.
- Version control using TortoiseSVN.
- Maintained technical documents by updating them to make them readily understandable and accessible.
- Successfully resolved service desk calls for allocated tasks using ServiceNow.
- Utilised outlook and SharePoint for effective team conversations.

Course Representative at University of Wolverhampton
09/2015 – 06/2016
Wolverhampton, UK

Represented CS students at various meetings and successfully resolved issues.
- Attended meetings with course leaders and presented course feedback to the students.
- Successfully requested extra revision support and project extension for final year Computer Science students.
- Learned leadership, communication and confidence skills through the role of course representative.
